

KHAING ZIN THEIN

**Junior Cloud Solutions Engineer | Junior
Project Coordinator**

+95 9458625795 · zkhine418@gmail.com ·
Mandalay, Myanmar

PROFILE

IT graduate with hands-on experience supporting cloud infrastructure, system operations, and networking environments. Skilled in AWS cloud services, Linux administration, infrastructure monitoring, and troubleshooting. Experienced in collaborating with technical teams, maintaining documentation, and supporting system deployments.

Seeking opportunities as a Junior Cloud Solutions Engineer or Junior Project Coordinator to contribute to reliable cloud solutions while developing skills in project coordination, system implementation, and technology delivery.

TECHNICAL SKILLS

- AWS Cloud Platforms, Basic Google Cloud Infrastructure
- CI/CD Fundamentals and Basic Infrastructure as Code (Terraform, CloudFormation)
- CI/CD fundamentals and Iac concepts
- Network configuration and troubleshooting
- Log monitoring, traffic analysis, and attack simulation
- Prompt Engineering and AI Tools Usage

SOFT SKILLS

- Problem solving
- Technical documentation
- Teamwork
- Communication
- Analytical Thinking
- Adaptability and Continuous Learning

WORK EXPERIENCE

Junior Cloud Engineer

Feb 2025 – Feb 2026
Myanmar | Remote

B8 ICT Solutions

- Supported cloud infrastructure on AWS and Google Cloud, including EC2, S3, IAM, and VPC configuration
 - Assisted with application hosting and server setup
 - Monitored cloud resources using AWS CloudWatch and helped troubleshoot system performance issues
 - Gained practical exposure to Docker and infrastructure automation concepts (Terraform, CloudFormation)
 - Applied basic cloud security practices, including IAM access control and permission management
 - Collaborated with remote teams to maintain stable and reliable cloud environments
-

Junior Network Engineer

March 2024 – May 2024
Internship | On-site

Star Matrix Technology

- Assisted with FTTH network installation and maintenance
 - Configured routers and switches for internal and client networks
 - Supported VLAN configuration and basic network segmentation
 - Assisted with network troubleshooting and connectivity issues
 - Provided on-site technical support during network deployments
-

PROJECT EXPERIENCE

Implementation of a Resilient Campus Network with Suricata IDS and ELK SIEM

Final Year Project – B.Sc. Computer Networks

This project focused on designing and implementing a secure and resilient campus network for more than 200 users. The goal was to improve network visibility and detect cyber threats by integrating Suricata IDS with the ELK Stack for centralized monitoring and analysis.

Responsibilities

- Designed a campus network architecture with multiple VLANs to separate users and services
 - Deployed Suricata IDS on an Ubuntu server to monitor live network traffic
 - Forwarded Suricata logs using Filebeat into the ELK Stack
 - Installed and configured Elasticsearch, Logstash, and Kibana to visualize security events
 - Simulated realistic attack scenarios such as:
 - ICMP flood attacks
 - Nmap TCP SYN scans
 - Access to known malicious domains
 - Verified that attacks were successfully detected and visualized in Kibana dashboards
-

Python & IoT Based Secure Bot

Bachelor Group Project

A group project focused on building a Python-based application using Flask and Arduino communication, developed inside a controlled virtual environment.

Responsibilities

- Led a student development team, coordinating tasks, timelines, and technical responsibilities
 - Designed the project structure and development workflow to ensure smooth collaboration
 - Set up and managed Python virtual environments, ensuring consistent development environments across the team
 - Defined and maintained project dependencies using requirements.txt
 - Supported implementation of OpenCV-Python for basic image processing features
 - Reviewed team progress, resolved technical blockers, and ensured successful project delivery
-

EDUCATION

Liverpool John Moores
University
2024-2025

Bachelor of Science in Computer Networks

Auston College
2022-2024

Higher Diploma in Infrastructure & Networks

CERTIFICATIONS

- AWS Certified Solutions Architect – Associate
 - AWS Certified Developer – Associate
 - AWS Certified CloudOps Engineer - Associate
 - Ethical AI: Essentials for Everyone – University of Cambridge
 - Gemini Certified Educator – Google
 - MikroTik Certified Network Associate (MTCNA)
 - ASEAN Data Science Explorers 2024
 - AI Ready ASEAN 2026
 - IELTS Test Report Form (Academic)
-

LANGUAGE

- Burmese - Native
 - English - Upper-Intermediate Proficiency
 - French - Basic
-
